## President's Message

The elections are done. The Executive Body of the club remained the same as last year. This tells me that we did a good job and the members were pleased. There are a few new names on the Volunteer roster but additional help is always welcomed. As I am writing this column, our committee members are hard at work scheduling this year's activities. It is the work of volunteers that keep this club operating as it does. We have many functions planned in upcoming months so get involved and meet other members who share your sense of pride in being a WOFGPA member. Please follow your monthly newsletter for upcoming event scheduled and give your support as often as you can.

It has come to the Executives attention that some members have more than one spot on the boat rack. It was decided at the Executive Meeting that each **membership** would only be allocated one spot, whether it is for a canoe or a boat. When your membership comes up for renewal, only one spot will be given to you and you must remove all boats/canoes except the one that you have decided to register in the boat rack at the club. This will allow other members the opportunity to get a spot on the boat rack and to have their boat easily accessible for use at the club. If you are a member who currently has more than one spot on the boat rack, please check to see when your membership comes up for renewal and start making alternate arrangements for storing your second watercraft.

A spring clean up work party is planned for April 29<sup>th</sup>. On April 8<sup>th</sup>, we will be stocking the pond with more trout, although there are plenty still in the pond. I am really looking forward to enticing one or two trout into the frying pan.

Yours in Conservation  
*Stan Gibbs*

**BOAT SAFETY COURSE**

June 21, 2006  
 6:00 pm start time

Phil Gingrich is offering a boat safety course at the club on June 21, 2006. He provides all instruction, course materials and the test. Upon passing, he will issue your Safe Boating card. It will soon be the law that all boaters, jet skiers and watercraft operators must have taken this course and provide proof by showing their card when requested. Phil anticipates a high demand for this course as the deadline quickly approaches. Our club President, Stan Gibbs, could not stress more how important it is for everyone (both water craft operators and passengers) to know boat safety and how it relates to you.

The course runs from 6:00 till 10:30 pm.

**The cost is \$ 40 for members  
 \$ 45 for non-members.**

To enroll in the course, call Phil at 668-1130 or email him at [phil.gingrich@sympatico.ca](mailto:phil.gingrich@sympatico.ca)

Remember to mark June 21, 2006 on your calendar once you are registered with Phil.

**On Olden Pond**  
Chapter 5  
By Jim Morrow

I want to explain why I call the different creatures by different names. I can't tell a male from a female just by looking at them. You can tell the difference with some of the creatures that fly. The males are usually prettier to look at. Their feathers are really bright and colourful. With creatures like Sidney and Sonia snapping turtle, who could tell which was which? I keep well away from both of them. I call all perch Percy or Petunia, and when I see a heron, any heron, it is either Harry or Helen. See what I mean?

All Canada geese are Gregory or Greta. You can usually tell the males from the females because Gregory is usually bigger than Greta. That's so he can protect Greta and her brood of chicks from other creatures. With all the other creatures like raccoons, rabbits and such, the babies will usually follow the mother. Sometimes with the Canada geese, you will see a whole parade. Papa will be in the lead then mama with her brood following close behind. That is really nice to see. I think that the big creatures are called Man. I say that because every time I see one of my cousins going up to thank the big creature for the food, the other big creature usually says "Nice fish Man". So, that's probably what their name is. Man. Fish do not really have a language of their own. We do have a really fantastic brain that tells how to and what to avoid. My cousins the Salmon can swim from the exact spot where they were born and swim hundreds of miles to the ocean and years later swim back to the same spot that they left years before. I don't know how they do it. They just do it. It is all in their brain. Some sort of map I guess. I see Tessie over by the weeds. I'll see if she wants some company.

See ya later.  
Toby
